Learning objectives and overview of session	Event Sponsors
Overall Aims: - Update on current clinical and service challenges and opportunities facing Primary Care in the management of TIA and Strokes. - Assessment and management of common headaches in practice. - Psychological Services for Primary Care. Issues: Transient Neurological Symptoms: are common in daily practice but what constitutes an urgent TIA referral? Strokes: What should every frontline practitioner know about prevention, acute assessment and management in the short and long term? AF, TIA and CVA: Are we doing the most we can to detect and prevent? Anticoagulation and Bleeding Risks: Should it be Aspirin, Warfarin or NOACs? Headaches: Is it tension, migraine, cluster or more sinister? What is the safe approach? Migraines: Prevention, Treatment and Prophylaxis, what is the latest? What guidelines, tools, resources and clinical scores guide our best practice? Psychological Services: What services can help us and how can we access them? - Many others you will bring and share on the day via our Q&A's	 Science For A Better Life      TEVA UK LIMITED THORNTON ROSS
