*What can the philosophy of science learn from recent epistemology?* It has recently been argued that work on the theory of knowledge can shed light upon a number of issues in the philosophy of science, for example, issues concerning the aim of science, scientific progress, and the nature of evidence and probability. This workshop will involve an author-meets-critics session to evaluate such arguments as they appear in the upcoming book by Alexander Bird: [Knowing Science](#) (OUP, 2022).

1000 – Opening remarks: Alexander Bird (Cambridge) on *Knowing Science*

1030 – Nicholas Emmerson (Birmingham) on Scientific progress
