# £10,000 Scholarships for Master's Degree Students

## Considering a career in Operational Research?

Start by making a good decision: apply for a £10,000 scholarship towards your Master's degree.

Operational Research (O.R.) is all about applying analytical methods to help make better decisions, and studying its techniques will give you rigorous problem-solving skills that can make a real difference to any organisation. From influencing the design of sports stadiums to setting prices of airline tickets, your analysis can make millions of pounds worth of difference to any business. Learn more at [www.learnaboutor.co.uk](http://www.learnaboutor.co.uk)

### We can offer help – up to £10,000 to get you started

Two Master's degree scholarships of up to £10,000 are available towards tuition fees for students who demonstrate academic ability but require funding to

continue their studies and fulfil their potential in making a future contribution to O.R. Successful candidates will be expected to engage with the OR Society by becoming a member and contributing to Society activities.

### How to apply:

You must be a UK National and must apply for a Master's degree where at least 40% of the modules relate to O.R. methods. If you meet these requirements, discuss this scholarship with your chosen university's admissions officer who can submit an application on your behalf.
